SW = Sherwin Williams

**Note: The Sherwin-Williams colors were established when the homes were originally constructed. Unfortunately, many of them are now obsolete meaning that color chips are no longer available. However, Sherwin-Williams can still mix those colors from their formulas.**

**Sherwin-Williams has created a table that can be used to cross-reference many of the original colors/numbers with the new replacement colors/numbers for which there are color chips available. The "Sherwin-Williams cross-reference table" can be viewed on the HOA website.**
